

Skills that lead to better POLICY AND PUBLIC VALUE

Ethos CRS delivers training Australia wide

The Ethos CRS approach

The work of designing, developing and delivering policies and programs is sometimes extremely difficult. Generating and delivering public value is often a challenge.

To be effective, policy makers must understand the world of policy—what works, what doesn't—and how good policy is designed and implemented in a dynamic and fast-moving environment.

This is where Ethos CRS comes in—we assist agencies to build capability and clarify thinking.

Our facilitators have successfully designed and implemented policies and programs for both the Commonwealth and state government agencies. They are experts who have both delivered policy programs and advised on policy interventions.

Workshops include:

- ➔ Introduction to policy
- ➔ Advanced policy skills
- ➔ Strategic policy
- ➔ Applying a risk-based approach to policy
- ➔ The art of successful policy implementation
- ➔ Policy for data practitioners
- ➔ Policy writing
- ➔ Public policy skills
- ➔ Evaluating and monitoring policy
- ➔ Policy, science and influence: mastering the authorising environment
